Lucas Ramadan

Data Scientist

EXPERIENCE

05/2016
Present

Play Bigger Advisors
Data Science Associate

- Worked with CrunchBase API to gather data on over 1 million companies in the technology industry, based in San Francisco
- Utilized NLP techniques to classify companies based on description, for data imputation
- Built model to predict startups most likely to succeed, based on proprietary definitions

08/2015
08/2016

GalvanizeU
Student, Ambassador

- Neural Network Project
  - Sequence analysis of proteins
  - Convolutional and Recurrent Neural Networks
- Probabilistic Graphical Model Project
  - Sequence analysis of proteins
  - Continuous Random Field, Markov Network
- Natural Language Processing Project
  - Classification of song genre based on lyrics
- Data Engineering Project
  - Analysis of twitter and SFPD data
- Speaking with leads and attending open houses

02/2015
08/2015

Play Bigger Advisors
Data Science Associate

- Two published research projects
- Analyzed 50,000+ rows of financial transaction data from companies based in Bay Area
- Found optimal time for companies to go public
- Created visualizations in Tableau
- Cleaned data and merged new quarterly updates to dataset with Python

EDUCATION

GalvanizeU + The University of New Haven ('15-'16)

- M.S. in Data Science
- GPA: 4.0

Whitman College ('10-'14)

- B.A. in Chemistry
- Academic Distinction ('13-'14)

SKILLS

Python

- Pandas, SKLearn, StatsModels
- Natural Language Processing
- Neural Networks, Optimization
- Matplotlib, Seaborn, Plotly

Statistics

- Significance, A/B Testing
- Probabilistic Graphical Models

Data Engineering

- SQL, NoSQL, Spark
- Amazon Web Services

Tableau
